PROJECTS

Course Finder

Collaborated on a team project to build a web-based platform using MERN for seamless online browsing experience of free courses offered by sites such as Udemy, Coursera and more.

Demo link: https://marvinkurland.tech

Github: https://github.com/bugemarvin/CourseFinder

Article:https://medium.com/@bugemarvin/course-finder-7ad7ba9aea80

Monty

Monty 0.98 is a scripting language that is first compiled into Monty byte codes (Just like Python). It relies on a unique stack, with specific instructions to manipulate it. The goal of this project is to create an interpreter for Monty ByteCodes files.
